Statement by Management on the annual report

The Board of Directors and the Executive Board have today considered and approved the annual report of Orifarm Group A/S for the financial year 01.01.2019 - 31.12.2019.

The annual report is presented in accordance with the Danish Financial Statements Act.

In our opinion, the financial statements and the parent financial statements give a true and fair view of the Group's and the Parent's assets, liabilities and financial position at 31.12.2019 and of their financial performance and cash flow's for the financial year 01.01.2019 - 31.12.2019.

We also find that the Management commentary provides a fair statement of developments in the activities and financial situation of the Group and the Parent, financial results for the period, the general financial position of the Group and the Parent, and a description of conditions referred to therein.

We recommend the Annual Report to be approved at the Annual General Meeting.

Independent auditor's report

To the shareholders of Orifarm Group A/S

Opinion

We have audited the consolidated financial statements and the parent financial statements of Orifarm Group A/S for the financial year 01.01.2019 - 31.12.2019, which comprise the income statement, balance sheet, statement of changes in equity and notes, including a summary of significant accounting policies, for the Group as well as the Parent, and the consolidated cash flow statement. The consolidated financial statements and the parent financial statements are prepared in accordance with the Danish Financial Statements Act.

In our opinion, the consolidated financial statements and the parent financial statements give a true and fair view of the Group's and the Parent's financial position at 31.12.2019, and of the results of their operations and the consolidated cash flows for the financial year 01.01.2019 - 31.12.2019 in accordance with the Danish Financial Statements Act.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs) and the additional requirements applicable in Denmark. Our responsibilities under those standards and requirements are further described in the *Auditor's responsibilities for the audit of the consolidated financial statements and the parent financial statements* section of this auditor's report. We are independent of the Group in accordance with the International Ethics Standards Board of Accountants' Code of Ethics for Professional Accountants (IESBA Code) and the additional requirements applicable in Denmark, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Management's responsibilities for the consolidated financial statements and the parent financial statements

Management is responsible for the preparation of consolidated financial statements and parent financial statements that give a true and fair view in accordance with the Danish Financial Statements Act, and for such internal control as Management determines is necessary to enable the preparation of consolidated financial statements and parent financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements and the parent financial statements, Management is responsible for assessing the Group's and the Parent's ability to continue as a going concern, for disclosing, as applicable, matters related to going concern, and for using the going concern basis of accounting in preparing the consolidated financial statements and the parent financial statements unless Management either intends to liquidate the Group or the Entity or to cease operations, or has no realistic alternative but to do so.

Auditor's responsibilities for the audit of the consolidated financial statements and the parent financial statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements and the parent financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements and parent financial statements.

Orifarm Group A/S

As part of an audit conducted in accordance with ISAs and the additional requirements applicable in Denmark, we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements and the parent financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Group's and the Parent's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by Management.
- Conclude on the appropriateness of Management's use of the going concern basis of accounting in preparing the consolidated financial statements and the parent financial statements, and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Group's and the Parent's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements and the parent financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group and the Entity to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements and the parent financial statements, including the disclosures in the notes, and whether the consolidated financial statements and the parent financial statements represent the underlying transactions and events in a manner that gives a true and fair view.
- Obtain sufficient appropriate audit evidence regarding the financial information of the entities or business activities within the Group to express an opinion on the consolidated financial statements. We are responsible for the direction, supervision and performance of the group audit. We remain solely responsible for our audit opinion.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Statement on the management commentary

Management is responsible for the management commentary.

Our opinion on the consolidated financial statements and the parent financial statements does not cover the management commentary, and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements and the parent financial statements, our responsibility is to read the management commentary and, in doing so, consider whether the management commentary is materially inconsistent with the consolidated financial statements and the parent financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Orifarm Group A/S

Moreover, it is our responsibility to consider whether the management commentary provides the information required under the Danish Financial Statements Act.

Based on the work we have performed, we conclude that the management commentary is in accordance with the consolidated financial statements and the parent financial statements and has been prepared in accordance with the requirements of the Danish Financial Statements Act. We did not identify any material misstatement of the management commentary.

Development projects

Development projects consists of development of generic medicine. The development of the products are progressing as planned and are expected to be completed within 1-3 years.

The Entity is continually scanning for and developing new generic medicine. It is the managements opinion, that newly developed generic medicine will contribute with positive contribution margin in the future, on equal terms with the currently product portfolio.

Management continuously evaluates the value of development projects in progress, and write-down projects which are unprofitable.

Group:

The Group companies has provided receivables from sales of goods and services, MEUR 69.4 and inventories MEUR 25.0, as security for debt to the Group's banks and credit institutions.

The Group companies are a party to litigation regarding alleged infringements of trademark and patent rights. Management believes that these legal proceedings will not lead to material losses for the company.

The group has normal trade obligations on returned goods, and no significant losses are expected.

Parent:

The entity has provided guarantees under which the guarantors assume joint and several liability for group companies net debt with bank and credit institution. Total net debt in relation to this guarantee is booked at MEUR 105.5 at 31. December 2019.

20. Contingent liabilities

Group:

The parent company and the Danish Group companies are jointly taxed with all Danish subsidiaries, with HBS Capital ApS as the administration company. The parent Company and the danish group companies are therefore held liable under the Corporation Tax Act rules for income taxes, and if any obligations to withhold tax on interest, royalties and dividends for the jointly taxed companies.

Parent Company:

In addition, there are also security for the debt to banks and credit institutions, pledged unlisted shares in certain companies with a total book value per. 31. December 2019 of MEUR 49.3.

Accounting policies

This annual report has been presented in accordance with the provisions of the Danish Financial Statements Act governing reporting class C enterprises (large).

The accounting policies applied for these financial statements are consistent with those applied last year. The annual report is presented in EUR.

Income statement items are translated at the average rate for the year. Balance sheet items are translated at closing rate. The exchange rate adjustment from the average for the year, respectively, previous year's closing rate are posted directly to equity.

Recognition and measurement

Assets are recognised in the balance sheet when it is probable as a result of a prior event, that future economic benefits will flow to the Group, and the value of the assets can be measured reliably.

Liabilities are recognised in the balance sheet when the Group has a legal or constructive obligation as a result of a prior event, and it is probable that future economic benefits will flow out of the Group, and the value of the liabilities can be measured reliably.

On initial recognition, assets and liabilities are measured at cost. Measurement subsequent to initial recognition is effected as described below for each financial statement item.

Anticipated risks and losses that arise before the time of presentation of the annual report and that confirm or invalidate affairs and conditions existing at the balance sheet date are considered at recognition and measurement.

Income is recognised in the income statement when earned, whereas costs are recognised by the amounts attributable to this financial year.

The consolidated financial statements

The consolidated financial statements include Orifarm Group A/S (parent company) and companies (group enterprises) controlled by the parent, see the group overview page 8. The parent company is considered to have control when it directly or indirectly owns more than 50% of the voting rights or in other ways actually exercises controlling influence. Companies in which the Group directly or indirectly owns between 20% and 50% of the voting rights and exercises significant influence, but no controlling influence, are considered as associated companies. See the group overview page 8.

Consolidation principles

The consolidated financial statements are prepared on the basis of the financial statements for Orifarm Group A/S and its subsidiaries. The consolidated financial statements are prepared by aggregation of uniform accounting items. On consolidation, elimination of intercompany revenue and expenses, and dividends as well as gains and losses on transactions between consolidated companies. The accounts used for consolidation are prepared in accordance with the groups accounting policies.

In the consolidated financial statement accounts of the subsidiaries are recognized 100%. Minority interests' proportionate share of net profit and net assets are presented as separate items in the income statement and balance sheet.

Accounting policies

Business combinations

Newly acquired or newly established enterprises are recognised in the consolidated financial statements from the time of acquiring or establishing such enterprises. Divested or wound-up entities are recognised in the consolidated income statement up to the time of their divestment or winding-up.

The purchase method is applied in the acquisition of new enterprises, under which identifiable assets and liabilities of these enterprises are measured at fair value at the acquisition date. On acquisition of enterprises, provisions are made for costs relating to decided and published restructurings in the acquired enterprise. Allowance is made for the tax effect of restatements.

Positive differences in amount (goodwill) between cost of the acquired share and fair value of the assets and liabilities acquired are recognised under intangible assets, and they are amortised systematically in the income statement based on an individual assessment of their useful lives, however, no more than 40 years. Negative differences in amount (negative goodwill), corresponding to an estimated adverse development in the relevant enterprises, are recognised in the balance sheet as a separate item under deferred income, and they are recognised in the income statement as such adverse development is realised.

Profits or losses from divestment of equity investments

Profits or losses from divestment or winding-up of subsidiaries are calculated as the difference between selling price or settlement price and carrying amount of the net assets at the time of divestment or winding-up, inclusive of non-amortised goodwill and estimated expenses for divestment or winding-up.

Foreign currency translation

On initial recognition, foreign currency transactions are translated applying the exchange rate at the transaction date. Receivables, payables and other monetary items denominated in foreign currencies that have not been settled at the balance sheet date are translated using the exchange rate at the balance sheet date. Exchange differences that arise between the rate at the transaction date and the rate in effect at the payment date or the rate at the balance sheet date are recognised in the income statement as financial income or financial expenses. Property, plant and equipment, intangible assets, inventories and other non-monetary assets that have been purchased in foreign currencies are translated using historical rates.

On recognition of foreign subsidiaries which are independent units, all amounts are translated at the year-end rate. Differences in the exchange rate which arise when translating the foreign company's equity at the beginning of the year using the exchange rates at balance sheet date are recognised directly in equity.

Derivatives

On initial recognition in the balance sheet, derivative financial instruments are measured at cost and subsequently at fair value. Derivative financial instruments are recognised under other receivables or other payables, respectively.

Changes in the fair value of derivative financial instruments classified as and complying with the requirements for hedging of the fair value of a recognised asset or a recognised liability are recorded in the income statement together with changes in the value of the hedged asset or the hedged liability.

Accounting policies

Changes in the fair value of derivative financial instruments classified as and complying with the requirements for hedging future transactions are classified directly on equity. When the hedged transactions are realised, the accumulated changes are recognised as part of cost of the relevant financial statement items.

For derivative financial instruments that do not qualify as hedging instruments, changes in fair market value are recognised currently in the income statement as financial income or financial expenses.

Changes in the fair value of derivative financial instruments applied for hedging net investments in independent foreign group enterprises or associates are classified directly as equity.

Income statement

Revenue

Revenue from the sale of manufactured goods and goods for resale is recognised in the income statement when delivery is made and risk has passed to the buyer. Revenue is recognised net of VAT, duties and sales discounts and is measured at fair value of the determined consideration.

Other operating income

Other operating income comprises income of a secondary nature to the Group's primary activities.

Cost of sales

Cost of sales includes the consumption of commodities and freight costs that are incurred to generate the calculated revenue.

Other operating external expenses

Other external expenses comprise expenses for distribution, sale, advertising, administration, premises, etc.

Staff costs

Staff costs comprise wages and salaries, social security costs, pension contributions, etc. for the Company's staff.

Income from investments in Group entities and associated entities

Income from investments in group entities and associated entities comprises the pro rata share of the individual enterprises' profit/loss after full elimination of intra-group profits or losses.

Financial income and expenses

These items comprise interest income and interest expenses, realised as well as unrealised capital gains and losses on liabilities and transactions in foreign currencies.

Income taxes

Tax for the year, which consists of current tax for the year and changes in deferred tax, is recognised in the income statement by the portion attributable to the profit/loss for the year and recognised directly in equity by the portion attributable to entries directly in equity. The portion of the tax taken to the income statement, which relates to extraordinary profit/loss for the year, is allocated to this entry whereas the remaining portion is taken to the year's profit/loss from ordinary activities.

Current tax payable or receivable is recognised in the balance sheet, stated as tax calculated on this year's taxable income, adjusted for prepaid tax.

Accounting policies

Deferred tax is recognised on all temporary differences between the carrying amount and tax-based value of assets and liabilities, for which the tax-based value of assets is calculated based on the planned use of each asset.

Deferred tax is measured based on the tax regulations and tax rates of the relevant countries that will be in effect according to law at the balance sheet date when the deferred tax is estimated to be triggered as current tax. Changes in deferred tax resulting from changed tax rates are recognised in the income statement.

Deferred tax assets, including the tax base of tax loss carryforwards, are recognised in the balance sheet at their estimated realisable values, either as a set-off against deferred tax liabilities or as net tax assets.

The Parent is jointly taxed with all Danish subsidiaries and parent companies. The current Danish income tax is allocated among the jointly taxed companies proportionally to their taxable income (full allocation with a refund concerning tax losses).

The jointly taxed companies are subject to the rules of section 11B of the Danish Companies Act governing interest deduction limitation. It has been agreed in the joint taxation that reduced interest deduction is recognised in the company in which the interest deduction has been reduced.

Balance sheet

Goodwill

Goodwill is amortised straight-line over its estimated useful life which is fixed on the basis of the experience gained by Management for each business area.

The amortization period of goodwill is 10-40 years.

The determination of the lifetime is decided based on an evaluation of a combined company with Know How, skills and a efficient organization, which is expected to provide development of the business in a long time to come, and because the lifetime of the medicinal products normally are very long.

When goodwill is subject to impairment, goodwill is written down to the lower of recoverable amount and carrying amount.

Files and application fees

Files and application fees are measured at cost less accumulated amortisation and impairment losses.

Files and application fees regarding a specific product in relation to which a potential future market can be demonstrated and where the intention is to market the product in question are recognised as intangible assets. Other costs relating to applications are recognised as cost in the income statement as incurred.

Files and application fees regarding generic products are amortised straight-line over their expected useful lives calculated from the date when the product to which the files and application fees relate is introduced to the market. The amortisation period is 5-12 years.

When files and applications are subject to impairment, files and application fees are written down to the lower of recoverable amount and carrying amount.

Accounting policies

Development projects in progress

Development costs comprises costs, staff costs and depreciations, directly associated to development activities.

Development projects, which are clearly defined and identifiable, and where the technical viability, resources and a potential future market can be established with the intention to produce, market or utilise the projects, are recognised in the balance sheet as intangible assets, if the cost are measured reliable, and there is a certain security, that the future profit will cover the production-, marketing- and administrations costs as well as development costs. Additional development costs are recognised in the income statement, as the costs occurs.

Development projects, are measured at cost less accumulated amortisation and impairment.

When development projects are completed, the products are amortised straight-line over their expected useful lives calculated from the date when the product to which the development cost relate is introduced to the market. The amortisation period usually used is 5-10 years.

Other intangible assets

Cost of development and implementation of major IT systems as well as other intangible assets is measured at cost with deduction of accumulated amortisation and impairment losses. The period of amortisation is usually 3-7 years.

When other intangible assets are subject to impairment, other intangible assets are written down to the lower of recoverable amount and carrying amount.

Property, Leasehold improvements and Plant and equipment

Properties, leasehold improvements and operating equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated.

Cost comprises the acquisition price, costs directly attributable to the acquisition, and preparation costs of the asset until the time when it is ready to be put into operation. Interest expenses are not included in cost.

The basis of depreciation is cost less estimated residual value after the end of useful life. The residual value amounts to 40% of the acquisition price. Straight-line depreciation is made on the basis of the following estimated useful lives of the assets:

Property:	10-50 years
Leasehold improvements:	5-10 years
Operating equipment:	3-10 years

Estimated useful lives and residual values are reassessed annually.

When property, plant and equipment are subject to impairment, PPE are written down to the lower of recoverable amount and carrying amount.

Profits and losses from the sale of property, plant and equipment are calculated as the difference between selling price less selling costs and the carrying amount at the time of sale. Profit or loss is recognised in the income statement.

Investments in group entities and associated entities

Investments in group entities and associated entities are recognised and measured under the equity method. This means that investments are measured at the pro rata share of the entities' equity plus or minus unamortised goodwill or negative goodwill on consolidation and plus or minus unrealised intra-group profits and losses.

The Parent's share of the entities' profits or losses after elimination of unrealised intra-group profits and losses and plus or minus amortisation of positive, or negative, goodwill on consolidation is recognised in the income statement.

Group entities and associated entities with negative equity are measured at zero value, and any receivables from these entities are written down by the Parent's share of such negative equity if it is deemed irrecoverable. If the negative equity value exceeds the amount receivable, the remaining amount is recognised under provisions if the Parent has a legal or constructive obligation to cover the liabilities of the relevant entity.

Accounting policies

Net revaluation of investments in group and associated entities is taken to reserve for net revaluation under the equity method if the carrying amount exceeds cost.

The purchase method is applied in the acquisition of investments in group and associated entities; see above description under consolidated financial statements.

Details on investments which can harm the business has not been shown in accordance to section 97a(4) of the Danish Financial Statement Act

Inventories

Inventories are measured at the lower of cost using the FIFO method and net realisable value.

Cost of goods for resale, raw materials and consumables consists of purchase price plus landing costs. Cost of manufactured goods and work in progress consists of costs of raw materials, consumables and direct labour costs as well as indirect production costs.

Indirect production costs comprise indirect materials and labour costs, costs of maintenance of and depreciation and impairment losses on machinery, factory buildings and equipment applied for the manufacturing process as well as costs of factory administration and management. Finance costs are not included in cost.

The net realisable value of inventories is calculated as the estimated selling price less completion costs and costs incurred to execute sale.

Receivables

Receivables are measured at amortised cost, usually equalling nominal value less write-downs for bad receivables.

Prepayments

Prepayments comprise incurred costs relating to subsequent financial years. Prepayments are measured at cost.

Cash

Cash comprises cash in hand and bank deposits.

Bank debt

Bank debt comprises debt to banks.

Mortgage debt

At the time of borrowing, mortgage debt is measured at cost which corresponds to the proceeds received less transaction costs incurred. The mortgage debt is subsequently measured at amortised cost. This means that the difference between the proceeds at the time of borrowing and the nominal amount of the loan is recognised in the income statement as a financial expense over the term of the loan applying the effective interest method.

Other financial liabilities

Other financial liabilities are measured at amortized cost, usually equaling nominal value of the liability.

Operating lease commitments

Lease payments on operating leases are recognised on an ongoing basis in the income statement over the term of the lease.

Accounting policies

Cash flow statement

The cash flow statement of the Group is presented using the indirect method and shows cash flows from operating, investing and financing activities as well as the Group's cash and cash equivalents at the beginning and the end of the financial year. No separate cash flow statement has been prepared for the Parent because it is included in the consolidated cash flow statement.

Cash flows from acquisition and divestment of enterprises are shown separately under cash flows from investing activities. Cash flows from acquired enterprises are recognised in the cash flow statement from the time of their acquisition, and cash flows from divested enterprises are recognised up to the time of sale.

Cash flows from operating activities are calculated as the operating profit/loss adjusted for non-cash operating items, working capital changes and income taxes paid.

Cash flows from investing activities comprise payments in connection with acquisition and divestment of enterprises, activities and fixed asset investments as well as acquisition, development, im-provement and sale, etc of intangible assets and property, plant and equipment.

Cash flows from financing activities comprise changes in the size or composition of the Parent's share capital and related costs as well as the raising of loans, inception of finance leases, instalments on interest-bearing debt, purchase of treasury shares, and payment of dividend.

Cash and cash equivalents comprise cash and short-term securities with an insignificant price risk less short-term bank debt.

Segment information

Information should be provided for business segments. No information is given in respect of geographical markets as the risk to which the markets are subject is found to be quite similar.

Financial highlights

Financial highlights are calculated as follows:

Gross margin:	$\frac{\text{Gross profit} \times 100}{\text{Revenue}}$
Operating margin:	$\frac{\text{Operating income} \times 100}{\text{Revenue}}$
Equity ratio:	$\frac{\text{Equity} \times 100}{\text{Total assets}}$
Return on equity:	$\frac{\text{Profit for the year} \times 100}{\text{Average equity}}$
